

In our continued efforts to bring the most advanced technology available to our patients, Perry Eye Care is proud to announce the addition of the Topcon Digital Retinal Exam as an integral part of your eye examination today.

As doctors, we are concerned about retinal problems including macular degeneration, glaucoma, retinal holes or detachments, and systematic diseases such as diabetes, stroke, and high blood pressure. These conditions can lead to serious health problems, including partial loss of vision or blindness, and often develop without warning and progress with no symptoms.

The Retina

A Digital Retinal Exam provides:

- An eye wellness scan.
- An in depth view of the retinal layers (where disease can start).
- The ability for you to view your retinal image with your doctor during your exam.
- A digital record for your medical file, which gives your doctor comparisons for tracking and diagnosing potential eye disease.
- The Digital Retinal Exam is non-invasive, fast, easy, and comfortable.

Insurance does not cover any advanced screening technology beyond the general eye exam. Your Doctor highly recommends the Digital Retinal Exam for all patients.

- YES** I **want** to take advantage of this new, advanced technology for an additional \$25.00
- NO** I **decline** the Digital Retinal Exam Screening against medical advice
